BADIRA PP

FRONTEND DEVELOPER

+91 6282432820 ✉ badirakunhabdulla@gmail.com 🌐 https://github.com/baadhira 📍 Cochin, Kerala, India

PROFILE

Dedicated self-starter and self taught Full stack developer with proven experience in building web applications, passionate about everything that revolves around art and technology.

TECHNICAL SKILLS

Programming Languages :

- Javascript
- Typescript
- Python Django

Frontend

- HTML
- CSS
- Bootstrap
- React JS
- Next JS
- Redux Toolkit
- RTK
- MUI

Databases

- PostresSQL

Version Controllers

- Git & Github

Backend

- Python Django

Deployment Tools

- AWS (EC2)
- Nginx (Web Server)
- Vercel

WORK EXPERIENCE

Front End Developer   October 2022-Present

Acabes international

Led end to end develment of **Reflect** a neo banking payment product using **Typescript , Redux** technologies concurrently **,** crafted **Global Transfer** similar neo banking payment application using same technologies, co-ordinated with team and worked in D**BPM(digital business process management)** which is bank process web application ,Worked on implementing an back office system which handle workflow , user access , Authorization , sync workflow which handle up to 100k Application per day

Reflect KYC

- Integral part of the team developing a cutting-edge neo banking application
- Designed and implemented various modules to collect Know Your Customer (KYC) data from customers, including advanced OCR (Optical Character Recognition) scanning of documents
- Leveraged **Redux Toolkit** for state management, ensuring a structured and maintainable application state.
- Bridge Functions: Worked with bridge functions to seamlessly integrate the React mini-app developed with the larger mobile application, ensuring smooth deployment and operation.

Arabi Mobile Global Transfer

- Played a crucial role in the development of a sophisticated application designed for transferring funds to both local and international banks.
- Utilized **TypeScript** to leverage static typing, which improved code quality, reduced bugs, and enhanced maintainability, Employed **Redux** for effective state management, providing a predictable and centralized state management solution.

Travel Insurance

- Actively contributed to the development and enhancement of various policy options modules, providing comprehensive solutions tailored to specific business requirements.
- Consistently delivered high-quality code, leveraging the power of **TypeScript** and **React Redux** for state management to ensure robust and maintainable software solutions.

NPSS

- Spearheaded the development and implementation of a comprehensive national payment systems strategy, aimed at modernizing and enhancing the financial infrastructure.
- Successfully developed a real-time payment system that facilitates instant fund transfers and settlements, ensuring a seamless and efficient financial transaction experience for users.
- Utilized advanced web development frameworks, particularly React for building user interfaces and **Redux** for state management, ensuring robust and scalable application architecture.

Education

Software engineer intern

- Brototype Cochin
- Nov 2021 - July 2022
- Self-learning platform (Industry experts assign and review our projects)

Bachelor Of Technology in Computer science engineering(2017-2021)

- APJ Abdul Kalam Technological University
- Overall CGPA 85%

Higher Secondary (2014-2016)

- NAM Higher Secondary School Under State Council of Educational Research and Training
- Overall CGPA 92%

Google Data Analytics Professional Certificate

- Data Analysis
- Creating case studies
- Data Visualization
- Data Cleansing
- Developing a portfolio
- Data Collection
- Spreadsheet
- SQL
- Data Ethics
- Data Aggregation

Digital business Process Management

- This is project to manage all the banking process and needs
- Worked in cheque book request module, Outward payment module, E-forms module ,user management module
- Worked on implementing an back office system which handle workflow , user access , Authorization , sync workflow which handle up to 100k Application per day

OTHER PROJECTS

Shopify Ecommerce

Github Repo: shopify   **Demo Link:** shopify admin side

- Implemented all the necessary e-commerce functionalities like product listing, cart, orders, etc.
- Additional features include:
1. Image Cropping & Product image zoom
2. Offers and Coupons
3. Sales Reports, Chart & Graph reports on Admin side
4. Product, user & category Management on Admin side
5. Load balancer and more

Technologies Used:

- **Django,Postgres ,Bootstrap ,JQuery ,Payment Integrations - Third Party:Paypal,Razorpay ,SMS - Twilio Verify (third party)**

Jobbee - Job Portal

Github Repo: Jobbee   **Live Demo:** Jobbee

Technologies Used:
  Next Js,Django rest framework Postgres, JWT

- Add the Jobs resource, Adding Pagination and Filteration
- Complete Authentication with Simple JWT, Protecting Routes from Unauthenticated Users
- Uploading files to AWS S3,Custom Exception Handling
- Server Side Rendering with Next.js
- Complete section for Employer, Posting new Jobs, Handling Candidates of a Job
- Generate Topic Stats like Java

Greenland - Ecommerce

Github Repo: Greenland   **Live Demo:** Greenland

Technologies Used:

  Django rest framework, React Js, Redux, Postgres, JWT,   PayPal API

- Living plants ecommerce website
- Full featured shopping cart
- Product reviews and ratings
- Top products carousel, Product pagination, Product search feature
- User profile with orders
- Admin product management, user management, Order details page
- Mark orders as delivered option
- Checkout process (shipping, payment method, etc)
- PayPal / credit card integration
